

Outstanding Addresses Mark Teachers' Meet

Largely Attended Gathering Hears Bishop Sherman, Calgary; New Officers-Elected

Outstanding addresses by men of marked character and ability featured one of the most interesting and largely attended conventions of the Red Deer Inspectorate Teachers' Association ever held in Lacombe, on Thursday and Friday, October 8th and 9th. Perhaps the highlight of the convention was the after-dinner address on Thursday by His Lordship Bishop Sherman of Calgary, whose topic was "The Threefold Church of the Future." People of today will have to meet the challenge of the future. Epoch, said the speaker, as he proceeded to outline historical events of the past century. Beginning with Alexander the Great, whose power culminated about 1900 years ago when the greatest figure this world has ever seen—Christ—was born. Some 300 years later, in the 30's, under Constantine, the first great toleration laws were passed, when the State accepted the Church and Christianity as such, and persecutions were stopped.

What of the Present? "What of the present 30's?" asked the Bishop. "It is in the 30's that the most tremendous change in our form of democratic government? People need to be thinking of a stand to take on the problems with which they are faced."

"The Challenge of a Common Heritage" formed the second part of the Bishop's address. The major note of every life is to be part of one great strength, said the speaker, as he challenged the teachers and others to pass along the great common Christian traditions of the past. There is no more significant thing than the way the trend of thinking has changed from the "beginning of things" to the "end and purpose" of things, said Mr. Sherman, as he entered the last phase of his talk—"The Challenge of Personal Education." One of the things fought

Spruceville

SPRUCEVILLE.—Don't forget the Juniors' Dance in the Hall on Friday night, Oct. 16. Ernie Douglas and his orchestra are providing the music.

Mrs. Marshall, Sr., has been spending a few days with her son, Mr. S. W. Marshall.

Jack Burton had the misfortune to be kicked by a horse and now he is on crutches, a small bone being broken in his arm.

The friends of Mrs. Southward regret to hear she is laid up again. She was taken ill Saturday night.

There was a lot of Thanksgiving entertaining done last Sunday. Mrs. Barnes entertained Mr. and Mrs. Carson of Spring Valley and Mr. and Mrs. Phil MacLellan of Blackfalds.

Mrs. Dave Boden had as her guests Mr. and Mrs. Parker and Mr. and Mrs. H. E. Heath and their respective families, while Mrs. O. S. Young and Mr. and Mrs. Walker, and Mr. and Mrs. Proudfoot to dinner, and Mrs. Boulter entertained the Wallace family.

Word has been received from the Nelson Hawks that they arrived safely at Guelph, Ont., and are having a splendid time.

The U.F.W.A. gathered at the home of Mrs. Barnes last Wednesday to make final plans for the annual chicken supper, to be held in the Hall Oct. 30th. A sumptuous menu was drawn up, attractive decorations planned and Bob Paulson's orchestra engaged to provide the music for the dance.

Fairview

FAIRVIEW.—The Lacombe Presbytery met at Fairview Church last Friday for their regular meeting. The Ladies' Aid furnished dinner supper and a good time was enjoyed by all. Many present expressed the wish to see more of these meetings held in the country churches.

The many friends of the Rev. Mr. Brett, who about six years ago was a pastor on this circuit, will be sorry to learn of the death of his eldest daughter, Mrs. Florence Parker, at Barons, Alta., on Oct. 1st. Mrs. Parker went to the hospital on Monday to be operated on for acute appendicitis and died on Thursday of the same week. She leaves behind her husband, father, one brother and one sister, and a baby girl, 13 months old.

The news of Mrs. Parker's death came to us through a letter written by her father to Mr. and Mrs. Brown. The sympathy of the district goes out to all the bereaved.

Those chickens which the minister secured for the supper on Oct. 23rd at the church—are getting in better shape every day and you will surely miss something good if you are not here to help eat them.

Threshing is about completed in the district, very little remaining to be done.

This Week's Thought

The man who is not contented with little is not contented with anything.

Good Prices Paid At Sheep Sale

Sale More Successful Than Last Year; Stock of High Grade and Average Price Good

One of the most successful sheep sales in years was held by the Central Alberta Wool Growers' Association at the Central Alberta Sales Pavilion Thursday of last week. The stock was of a high grade and prices obtained were considerably higher than those of last year. The total amount realized from the sale was \$2268.40.

Clarence C. Dunton, well known auctioneer from Bentley, kept the bidding brisk and maintained interest at a high point throughout the sale.

The sales and average prices obtained were as follows: 13 Suffolk rams averaged \$23.30 each; 27 Hampshire rams averaged \$19.44; 20 Oxford Down ewes averaged \$15.51, and one Cheviot ram sold for \$10.

Forty-five Suffolk ewes averaged \$8.78 each; 21 Hampshire ewes averaged \$6.50, and 176 grade ewes averaged \$3.20 each. The top price paid for a Suffolk ewe was \$11 and the highest price for a Hampshire ewe \$7.50. The highest price paid for a Suffolk ram was \$30; top price for an Oxford Down ram was \$30, and for a Hampshire ram \$36.

Most of the buying was by individual sheep raisers and farmers of Lacombe and surrounding districts, of which a very large number attended.

Swine Breeders to Hold Field Day

An exceedingly interesting and instructive program has been arranged for the Swine Breeders' Field Day at the Dominion Experimental Station, Lacombe, on Saturday, Oct. 17th.

A. W. Peterson, of the Dominion Livestock Branch, Ottawa, a well known authority on swine, will discuss the swine business from an angle new to the producer. In the course of his address Mr. Peterson will explain a number of points concerning which most breeders have only the vaguest of ideas.

The Field Day program will include a review of the work with particular emphasis on recent developments.

Losses of young pigs were once considered a necessary evil, but it has been discovered that they may be largely prevented by proper handling of the sow and litter. The opportunity would, therefore, be afforded to discuss the subject and also actual cash value to every swine breeder will be discussed and explained by officials of the Experimental Station and Dominion Livestock Branch.

The program will start at 1:30 p.m., but you are invited to come early and spend a couple of hours in the lunch in going over the other phases of the Experimental Station's work. Bring a picnic lunch and make up a party of friends and neighbors. Coffee, cream and sugar will be provided for a basket lunch.

Former Morningside Resident Dies

Many friends in and around Morningside were deeply grieved when it became known that Mrs. Florence Brett had passed away after a short illness due to appendicitis. The late Mrs. Parker was the eldest daughter of Rev. R. H. Brett, who came to Morningside nearly 50 years ago. He had charge of the work here and at Fairview and Meadowbrook for three years, before he was transferred to the pastoral charge of churches at Barons and Nobleford, where they have resided since.

Was Well Liked
Florence was a most estimable and highly respected girl and was greatly admired by everyone who was fortunate enough to have made her acquaintance. She was a splendid pianist, having her A.T.C.T., and was ever ready to give of her talent when asked. She was married to Mr. William Parker of Nobleford and leaves one child, a year old. Besides the husband and child, the father, one brother (Cecil) and one sister (Mary) are left to mourn her loss. Dearest sympathy is extended to the sorrowing ones in their great bereavement.

James Layton of Edmonton spent last week-end with his parents.

Don't forget Mrs. C. Jacobson and Son's Public Auction at 1:30 o'clock on Friday, Oct. 23. See sale bills for particulars.

Enroute to his home at Prince Rupert, B.C., from attending the general conference of the United Church at Ottawa, Rev. C. D. Clarke visited his brother, R. W. Clarke, during the past week-end.

Mr. and Mrs. George L. Dancocks and Billy of Calgary spent the week-end with Mrs. Dancocks' parents, Mr. and Mrs. S. English.

In the Card of Thanks notice published in the Globe last week, the name of Mrs. James Wagner should have appeared.

Mrs. T. H. W. Thompson is opening a class for French Conversation. Those interested Phone 121.

Mr. and Mrs. George L. Dancocks and Billy of Calgary spent the week-end with Mrs. Dancocks' parents, Mr. and Mrs. S. English.

In the Card of Thanks notice published in the Globe last week, the name of Mrs. James Wagner should have appeared.

Mrs. T. H. W. Thompson is opening a class for French Conversation. Those interested Phone 121.

Ducks Plentiful; Shooting Poor

"Ducks and geese are plentiful but shooting is very poor because there are too many hunters," said "Foxy" Parsons, local hunter, last week. Joe Edgington, another hunter of repute informed the Globe that "there are more ducks this year than I have seen for 10 years."

Mr. Edgington has been hunting north of Toes at Gadsby's Lake, or Bill Weatherill's farm, and north of Bentley, in and around Gull Lake, but said that these spots are pretty badly shot up.

Both hunters claim geese to be in abundance east of Lacombe.

Lacombe Beaten In Rugby Game

Ponoka High School took the long end of a 19-0 score in a Thanksgiving day rugby football game with the local High School team here on Monday. Lacombe had the kick-off against the wind, Ponoka working the ball well down the field before losing it to Lacombe.

Lacombe was unable to make yards and tried a punt, too close in, and were blocked. Ponoka, the heavier team, kept working the ball and got within scoring distance several times and finally were able to make a rouge for one point before the quarter ended.

In the second quarter Ponoka scored a touchdown, forward pass, it crossed the line. They converted the kick. Score end of the half: 7-0.

Another Touchdown
In the third quarter, Ponoka scored five points on a touchdown and the kick was blocked before it got away.

In the final quarter Lacombe had the ball within about fifteen yards of the line.

Lineup of Teams
Ponoka—Harris, Knipfel, Gilchrist, Chandler, Elston, Innis, McLeod, Nelson, Thomson, Holmes, Lee and Keefling.

Lacombe—McFadden, Wilks, Todd, McCormick, Wallace, E. Todd, Chapman, Hainsworth, Gilmore, Carter, Perkins, I. Todd.

Referee—Fred Mast, Lacombe.

Fire Inspection To Be Made

All business houses in Lacombe will be visited within the next two weeks by members of the Fire Brigade, Fire Chief Sage informed the Globe Wednesday afternoon.

This inspection is an annual affair and has as its purpose the elimination of all possible fire hazards. Local business men are asked to co-operate with the fire fighters and assist them in their task.

Around the Town

Among the many University of Alberta students who arrived in town to spend Thanksgiving holidays with their parents were Don Moore, Bill Fraser, Laurence Winter, Robert Taylor.

The many friends of Webb Frizell will be pleased to learn that he has accepted a position in Swift's packing plant, Edmonton. Lacombe's sporting fraternity wish him every success. Webb will be missed.

The Ladies of the Orange Lodge are holding a Bazaar and Sale of Home Cooking on Saturday, Oct. 31, at the Oddfellows' Hall, from 3 to 6 p.m.

Mr. and Mrs. Eric McAllister motored from Edmonton last week-end to visit with the latter's parents, Mr. and Mrs. W. N. Morrison.

The Senior Girls' Group of the C.G.L.T. met at the home of Mrs. T. Wilks on Tuesday night. The hostesses for the evening were Betty Wilks, Nancy Ford and Myrtle Cummings. Mrs. Arthur Newman gave an interesting talk on the story of the Bible. The group has started work on a quilt for missionary work.

James Layton of Edmonton spent last week-end with his parents.

Don't forget Mrs. C. Jacobson and Son's Public Auction at 1:30 o'clock on Friday, Oct. 23. See sale bills for particulars.

Enroute to his home at Prince Rupert, B.C., from attending the general conference of the United Church at Ottawa, Rev. C. D. Clarke visited his brother, R. W. Clarke, during the past week-end.

Mr. and Mrs. George L. Dancocks and Billy of Calgary spent the week-end with Mrs. Dancocks' parents, Mr. and Mrs. S. English.

In the Card of Thanks notice published in the Globe last week, the name of Mrs. James Wagner should have appeared.

Mrs. T. H. W. Thompson is opening a class for French Conversation. Those interested Phone 121.

Voters' List Will Close October 31

Application For Inclusion In Voters' List Needed Before End of This Month

Is your name on the voters' list? If not, be sure to make application for inclusion in the voters' list before the end of this month. Any eligible and not doing so will have to wait another year before having the power to exercise their franchise. Qualifications which entitle you to vote follow:

The wife, husband, father and mother and every son and daughter of any person whose name appears upon the assessment roll or of any tenant who has rented an assessed parcel for a period of 12 months immediately preceding the last day of August, 1936.

If he or she is the resident with the person within the Town or assists him in a business in respect of which he is taxable; and

If he or she is the full age of 21 years; and

If his or her name does not already appear on the roll.

If you are eligible, your name will be added to the voters' list by applying to Lewis Minkler at the Town Office.

Man Found Dead In Overturned Car

ALIX.—Apparently having lost control of his motor car on the highway three miles north of Alix, Harold Kindon of Stettler was found dead in the overturned vehicle by the roadside Friday afternoon. As far as police could discover, there were no witnesses to the accident.

The macabre discovery was made by Andrew Allen and Peter Margat of Alix as they passed the scene. The accident is known to have occurred some time between 10 a.m. Friday and the time the overturned car and body were discovered.

From marks in the road, the motor car—a light roadster model—had skidded on approaching a curved incline and careened into a ditch, turning over. The driver, who was alone in the car, was trapped beneath the wheel and the time the overturned car and body were discovered.

Dr. W. J. Warren, coroner, and Royal Canadian Mounted Police investigated the tragedy. An inquest will be held next Friday.

CANADIAN LEGION MEETING

A meeting of the Canadian Legion will be held in the Town Hall on Saturday, Oct. 17th, at 8 o'clock to appoint committees and complete arrangements for the big Armistice Ball and Amateur Contest to be held on Nov. 11th.

The Legion will need the assistance and co-operation of all returned men to make this event a success. Come to this meeting and "do your bit."

Stuart Fraser, Gordon Sweet and Bob Johnston motored to Edmonton Sunday, where they spent the holiday.

Miss O. Danner, Mrs. Ada Vaughan and Miss Viola McLean spent the holiday week-end in Edmonton, visiting Mrs. Vaughan's sister, Mrs. H. Campbell.

Jim Pike and Jim Fairhair travelled to Calgary Saturday, where they spent the holiday week-end visiting friends and relatives.

The regular monthly meeting of the Lord Lancelotti Chapter, I.O.O.F., will be held Oct. 19th at the home of Mrs. P. W. Pratt.

The sub-executive of the W.M.S. Presbyterial will meet at the home of Mrs. P. A. Bainforth, Eclipse, on Friday, Oct. 23rd, at 2:30 p.m.

Dr. R. H. Trott of the Royal Alexandra Hospital staff, Edmonton, spent last week-end in Lacombe with his parents, Mr. and Mrs. W. J. Trott.

Mrs. R. Warrior left for Edmonton Tuesday night to visit with her daughter, Mrs. Mowbray, for a few days.

Mr. and Mrs. L. Mathieson had as their guest Miss B. Graham of Ponoka for a few days.

The Senior Group of the C.G.L.T. girls enjoyed a sunrise hike to Crescent Lake Wednesday morning.

Mr. and Mrs. L. Minkler and family spent the holiday week-end north of Mirror. Mr. Minkler reports the shooting poor in that district.

Miss Maude Tees returned over the week-end from an extended visit with friends in Calgary and relatives at the coast.

The General Business Meeting of the Last-We-Forget Club will be held in the Town Hall on Wednesday, Oct. 21, at 8 p.m. Arrangements for the sale of poppies on "Poppy Day" will be made, also for the annual church service.

Wheat Board Methods Subject of Discussion

Lew Hutchinson, Director of Alberta Wheat Pool, Speaks Before Board of Trade

Under the auspices of the Lacombe Board of Trade, with President S. J. Boyd presiding, Lew Hutchinson of Duhamel addressed a public meeting on Friday night on "The Canadian Wheat Board." Detailed explanation of the working of the present methods of marketing, termed the future marketing system, were given by the speaker. Developed during the Civil War in the United States, it has become very complicated, and although various steps were taken to prevent cornering of grain and giving insurance to dealers, nothing has been done towards protecting the producers—in fact through manipulation of the market by speculators the farmer's equity in his grain may be completely wiped out. Also because of the hedging policy and artificial restriction, the future marketing system has ceased to be an active thermometer of the world's requirements of grain.

Tells of Advantages
As against the uncertainties of present methods, Mr. Hutchinson told the advantages of controlled marketing under a Wheat Board, which would provide protection for the producer in addition to operating profitably to the elevator companies.

He defended the action of the Wheat Pool in refusing to meet Argentine prices and swamp the market in 1929, but he said the Pool had never refused to sell wheat on the Winnipeg market.

Although present prospects seem brighter, the speaker felt it to be only temporary because of the two excessive droughts over the American continent and in various other parts of the world.

A bumper crop would find the situation unchanged and the problem still unsolved.

Need Method of Control
Just as traffic rules have been changed to meet changing conditions, so it is necessary to institute some method of control over grain marketing which will insure to the producer a fair price for a certain quantity of his wheat.

The products of no other industry are subject to sale at "forced auction" as is the produce of the farmers under the present future marketing system.

Mr. Hutchinson urged that the farmers co-operate in giving consideration and taking action upon this matter. He asked the question forum followed the address.

Boys 15 and Under
100 Yard Dash: 1. Alvin Trott; 2. Allan McFadden; 3. High School; 4. Trott; 2. A. McFadden; Hop, Step and Jump: 1. A. Trott; 2. Chester Irish; Shot Put: 1. A. Trott; 2. A. McFadden; Relay: A. Trott, A. McFadden, B. Lister, Mark Webster, Running Broad Jump: 1. A. Trott; 2. A. McFadden.

Boys 15 and Under
100 Yard Dash: 1. Cameron Lanskett; 2. Dick Boulter; 3. Vernon Henderson; 2. David Farrell, Running Broad Jump: 1. D. Farrell; 2. Reg Wilks; Shot Put: 1. Laurie Hainsworth; 2. D. Boulter; 3. C. Lansell; D. Boulter, R. Clift and D. Proudfoot, Hop, Step and Jump: 1. D. Farrell; 2. Reg Wilks.

Girls 15 and Under
100 Yard Dash: 1. Kay Hay; 2. Colleen Jamieson, Running Broad Jump: 1. Kay Hay; 2. C. Jamieson; High Jump: 1. Kay Hay; 2. Jean Thompson; Softball Throw: 1. K. Hay; 2. Gerda Matheson; Relay: K. Hay, C. Jamieson, Doris Dames, G. Matheson, Hop, Step and Jump: 1. K. Hay; 2. D. Danner.

The High School rugby team dropped its second straight game to the Ponoka team here on Thanksgiving Day, being smothered under a 19-0 score. In the two games the locals have scored only five points to their northern rivals' 26.

Our team has good material but it needs one thing—a coach—to mould it into a smooth working and efficient squad. Could anyone help them out?

MEN'S CLUB STARTS SEASON

Starting to function again for the ensuing season, the Men's Club will hold its first meeting in the Church Hall next Tuesday night, Oct. 20th.

It is expected that a full turnout of members will be in attendance. A new slate of officers, will be elected and the guest speaker will be W. J. McLean, Red Deer, former school inspector for this district, who will give an interesting talk on his experiences while attending the Olympic Games, held in Berlin, Germany, this year. Any visitors are cordially invited.

TEA AND DISPLAY OF "MADE IN ALBERTA" PRODUCTS

The Ladies' Social Group of Lacombe are holding a tea and display of "Made in Alberta" products in the Church Hall, Lacombe, on Saturday afternoon, Oct. 24th.

The groups are working hard to make this event impressive regarding the number of articles grown and manufactured in Alberta and are hoping for a good attendance.

Do You Remember—'Way Back When'?

(From the Minutes of the Town Councils)

25 YEARS AGO—OCTOBER, 1911
A letter from A. Kent has been received by the Town Council, asking their aid in raising his building to the level of the sidewalk on Barnett Avenue.

The Alberta Municipalities asked the presence of a delegate from Lacombe at their regular annual meetings.

10 YEARS AGO—OCTOBER, 1926
H. F. Worn was awarded the contract for the position of scavenger of the town, after two tenders for the position had been received. The tender of F. L. Dunphy for the removal of the risk has been accepted by the Council. The agreement has a term of three years.

A Quid Pro Quo

If the Dominion government is to open the gates ajar for the admission of more British subjects on a colonization basis, it would seem appropriate to suggest that any agreement which may be made should include some provision for the sale of more Canadian produce in the Old Country.

From the viewpoint of Western Canada where new settlers must necessarily engage in a competitive venture with farmers who, in recent years at least, have been forced to offer their wares in a narrowing market, such a proposal would only be a reasonable quid pro quo for accepting new settlers.

It is true that colonization schemes in general and the Hornby scheme in particular, which are now being mooted and are apparently being accorded serious consideration in some quarters, contemplate safeguards to ensure that for at least five years after admittance to the country migrants would not become charges on the administration and that failures would be returned to the country of their origin.

While this may be regarded by some people as satisfactory on the face of it, such safeguards are not sufficient for the protection of thousands of farmers in the prairie provinces who during the past five or six years have not only experienced the greatest difficulty in making a bare livelihood but have had the misfortune to stagger—and are still staggering—under an accumulating burden of indebtedness.

Such colonization schemes, insofar as the west is concerned, have land settlement as their objective which means, of course, that the newcomers will be engaged in the production of agricultural commodities. If they are successful in their efforts the volume of produce offered for sale must necessarily increase with a resultant tendency to reduce returns to all producers of similar commodities.

The only way that this trend can be offset is the creation of new or expansion of existing markets for such produce and the latter might be attained by agreements which will ensure a greater volume of sales of Canadian farm products in the country from which the migrants come. Such agreements, if consummated, coupled with rigid guarantees that the new settlers will be self-supporting, might be expected to at least minimize any indirect loss which the older settlers would sustain as a result of ensuing competition.

New Zealanders, who have been sounded out on the subject of British migration to their country have something of the kind in mind, as evidenced by the report of William Teeling, who recently visited Australia and New Zealand to examine opportunities for British settlement in the two Antipodean countries, with respect to New Zealand, he is quoted in a recent issue of the London Times as stating:

"From both these Dominions I came away with the impression of young people in young countries convinced of the future of their race, convinced that they had something to interpret from the West to their neighbors in the Far East, and convinced that they still had a lot to do in their own countries before they were ready to admit too many strangers. They seemed, however, quite willing to admit a few under careful and proper auspices."

"It struck me that the best opening was in New Zealand, and that there it could only be achieved through the New Zealand Government (not other large body being sufficiently interested) and by a definite economic bargain for the purchase of New Zealand goods."

Without going into details of the reasons advanced, Mr. Teeling found that prospects for British migration to Australia were practically hopeless at the present time.

Thus it would appear that any British colonization in New Zealand must necessarily be very limited and must be accompanied by an economic pact as a consideration, a suggestion that should certainly be given great weight by Canadian authorities before any agreement is entered into for additional colonization in this country.

Proponents of further colonization in this country have argued that new settlers are consumers as well as producers. This is true, but if they are to be successful they must produce more than they consume, in which case a market must be found for the excess production somewhere. If they do not produce more than they consume, colonization is for them a failure and it would be better for them and the country, if the scheme were abandoned before birth.

Professor Makes Discovery

Finds Green Peppers Contain The Precious Vitamin C

The green peppers that Professor Albert Asen-Gyorgy, Szeged, Hungary, spurned at dinner one night gave him the clue to the source of precious vitamin C he had sought for a long time.

On that particular evening his wife had revoked her ban on his after-hours work, and he retired to his laboratory to continue his hunt for the anti-scurvy substance.

He took the peppers with him, intending to eat them later. But instead, he subjected them to tests just as he had almost everything else available—and found that the vitamin C content of the peppers was in the neighborhood of 400 units.

In a few weeks he managed to produce a pound of pure vitamin C from 4,000 pounds of green peppers which he discovered have four times the vitamin C content of oranges and lemons, and are cheaper.

Another Mystery To Solve

Reason Silica Turns Into Poison

Science has one mystery yet to solve in silicosis, the most dangerous of all dust diseases.

The mystery is why silica, the dust responsible, turns into a poison when ground to particles the size of bacteria. The surprising behavior of silica was explained at the Harvard Tercentenary by Dr. W. Irving Clark and Prof. Philip Drinker at the Harvard school of public health.

Beach sand is almost pure silica. Silica is part of the beauty of opals and occurs in quartz, flint, sandstone, Jasper and all other common substances. In all of them it is harmless to human beings.

When ground fine enough to fly in the air particles of silica cause a distinct, new lung disease.

Has Supply Filters

Leo M. Stender, of Waterloo, N.Y., 16, of New York City, by the genius of his supply filters, can produce, at a moment's notice, from a plain table napkin a bishop's mitre, a wedding cake, a sailboat or a clown grinning under a fool's cap. He demonstrated his prowess recently before a meeting of the Hotel and Restaurant International Alliance in Rochester, N.Y.

Manufactures Wind

Full-size aeroplanes can now be fully tested before being actually flown, in a wind-tunnel at Farnborough, England. In this huge apparatus winds up to 115 miles per hour can be manufactured to order.

Trees breathe through tiny openings on the under side of their leaves. A single apple leaf has more than 4,400 of these pores.

Used To Motor Cars

Reason So Many People Have Never Ridden On Trains

Every once in a while nowadays—much more frequently than in the past—stories appear in the newspapers about passenger trains, the service they give and the people who ride on them. And in some of these stories the fact is mentioned that many people are riding on trains for the first time in their lives.

These people aren't from any backwoods region, either; where a train would be something of a curiosity. They are from towns and cities, and in the course of their lives have frequently watched trains go by, possibly gone to the station to welcome friends. But they have never been passengers themselves, and the reason is that they're young people, born since the day the motor car displaced the train as the chief means of travel.

People who have never ridden on trains are not common in Port Erie. There are too many railroad people here, and railroad men and their families get passes when they want to travel. But in other towns where railroads aren't a leading industry, it is not an uncommon thing to find many of the younger generation who have done all their travelling by car or bus.

Now, however, train travel is becoming popular again and the next generation may be more train-conscious. The railroads are responsible for a great revival of interest in their trains. In the last two or three years they have publicized their streamliners, made much of their improved service, and worked hard to eliminate the attitude of unconcern maintained toward the public by the railroads a few years ago.—Fort Erie Times-Review.

Asks Farmers To Co-operate

Eastern Cattle Men Urged To Aid Feeder Plan

Hon. J. G. Gardiner, minister of agriculture, made an appeal for the co-operation of farmers of eastern Canada in the government's efforts to aid cattle breeders in the drought areas of the prairie provinces. He was addressing the livestock exhibitors at the Central Canada exhibition at Ottawa.

"I am told that here in the eastern area, between this district and the maritime there is an abundance of roughage feed," Mr. Gardiner said. "That is why we are hopeful of the success of our plan. But this plan will not be for the benefit of the western farmers alone, while it is true that we are offering to pay the fares of those who go west to buy feeder cattle."

"If the cattle after being brought east are fed for three months, the government will refund half the freight paid to bring them here. There is a direct benefit to come for those who do take the cattle for feeding."

Government Cleans Mint

Expects To Recover Large Amount Of Gold Dust

Housecleaning may mean dust and dirt to most people, but it means gold, running to thousands of dollars, for the Royal Canadian Mounted Police. When the smelting furnaces at the mint are moved to the new wing, officials of the institution where all Canada's coinage is made and all gold held, will thoroughly clean the rooms being vacated. According to J. C. Campbell, master of the mint, it is expected that a very large amount of gold will be recovered in the process of cleaning the floors, ceilings and walls.

This reclaimed gold consists of billions of tiny particles which have been carried off by smoke and gases from the huge smelting furnaces, and which eventually come to rest on the walls and floors of the rooms.

Double Parachute Tested

Soviet Engineer Claims It Will Descend Much Slower

Tests of a double parachute devised by a Soviet engineer have been made near Moscow. The two envelopes combined are 40 per cent smaller than an ordinary parachute, yet it is claimed that the new model will retard the velocity of descent by 30 per cent. In descending the lower parachute opens first, and the air rushing through an opening in the centre compels the upper one to open.

Gives Excellent Results

Excellent results from blood-testing poultry flocks are reported from all parts of Canada. A breeder in British Columbia who had his flock blood-tested last fall at a cost of \$16 sold hatchery eggs to the value of \$608 to one of the commercial hatcheries. As a result of record of Performance certified stock by an Ontario breeder to a breeder in the United States, R.O.P. certified females sold for \$5 each and an R.O.P. male for \$15.

A manure set 1,500 years old, and almost exactly similar to the kind in use today was discovered during some excavation work in Hungary last year.

To help induce women of Berkeley, California, to submit to universal volunteer finger-printing, Police Chief J. A. Greening promises they won't have to give their right eye.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Ready to Go

The liver should purify your blood daily. If this fails and becomes clogged, your food does not get into the blood. The blood then just flows in the bowels, which means you are constipated. Liver pills go into the body, and you feel better, and the world looks pink.

Meeting With Success

Native Women Doctors in India Doing Good Work

Women in India are learning to have great faith in members of their own sex, with the result that native women doctors and trained nurses are beginning to enjoy successful careers. Dr. Millicent Vere Webb, C.B.E., and Miss Alice M. Quinn, two distinguished English women, who were visiting in Winnipeg, have had much to do with this trend of affairs. Dr. Webb has spent 26 years in India and is most enthusiastic about the advance medical training for women has made there. Indian women cannot be attended by men, so that their lot, since medical training has been available to members of their own sex, has been a much happier and healthier one. For some years Dr. Webb was principal of the Women's Medical School at Agra, where an average of 15 women doctors graduated every year. Total average of the Indian women college graduates is 100 a year at present.

What Dr. Webb has done for the medical service, Miss Quinn has accomplished for nursing in India. She is a graduate nurse of Bombay and London and since 1916 has been superintendent of nurses in women's hospitals in Calcutta and Agra, working much with her friend, Dr. Webb. She has been a member of the Council of the Trained Nurses Association of India and has done a great deal to improve the standards of nursing in that country. She was awarded the silver Kaisar-i-Hind medal in 1933 and the Silver Jubilee medal in 1935.

A Real Transformation

Modern Living Room Better Than Old Style Parlor

What has become of the large family Bible that used to be a landmark in any front parlor? According to Rev. F. W. Miller of Australia, the Bible has been ousted by the radio. He says the parlor has become a living-room and the Bible has been relegated to some back room out of sight.

The passing of the old family Bible will be regretted by all of us who can remember when it was the most important and most impressive object in the parlor. In those days the parlor was the receiving room and show place of the home. The furniture was of the stiff horsehair variety which was decidedly uncomfortable to sit on but was regarded as an absolute necessity in the furnishing of such rooms.

The shade was kept scrupulously drawn full-length so as to exclude all possible sunlight which might fade the inevitable carpet. The door was closed tightly with the result that the room emitted a dank, chill air in winter and hot, stifling air in summer.

The status of a guest with the household could easily be determined by the room to which he was ushered. The minister, for instance, was automatically seated on the horsehair sofa but a visiting poor relation sampled the hard, wooden benches in the kitchen.

The passing of the family Bible with its records of births, deaths and marriages and as a hiding place for all kinds of odd documents is to be regretted. But the transformation of the old parlor into the popular living-room of today will be mourned by few.—Kingston Whig-Standard.

Just Recently Known

Twenty-five per cent of the vegetables and fruits people eat were unknown even ten years ago. They come from strains of plants that didn't exist a decade past. Canteen, for instance, a popular item on many tables. A few years ago it was scarcely possible to produce them because they were afflicted by a mildew. A. A. Cottrell discovered a species in India that resisted mildew, and by cross breeding, made the plants of this continent.

Bear's Head On Coin

Monarch II, last known survivor of the California valley grizzly bears, now in Ban Francisco Golden Gate park, is to be immortalized. His head will grace a coin commemorative of the completion of the San Francisco-Oakland Bay bridge.

Apricots, peaches, pomegranates, and oranges were referred to by the ancient Romans as "apples." They distinguished the fruits by the names of the countries where they were grown.

Gives Plenty Of Thrills

Taxi Drive Through Parks Streets No Truce Affairs

There is no obvious reason why Paris taxi-drivers should be in a hurry, but they are, writes C. B. Pyper, in the Toronto Telegram. The first taxi I boarded was a little yellow taxi with a license plate number in innocent as a child's go-cart. The driver was an insignificant-looking little person with an insignificant moustache and the excursion seemed to hold no promise of a thrill.

He half-turned a careless head and I gave him the name of the hotel. The result was amazing. It was as though all his life he had wanted to get to that hotel, had never had a chance till then and was resolved that no one should rob him of it when he had it. With one jump we were off and before my gasp was finished we were half a dozen blocks away.

He kept it up too. The suburbs in Paris—there were three on our route—are far apart, but he made them look like the continuous undulation of a roller coaster. He streaked his yellow flash in and out of the traffic like a hummingbird on the wing, flitting his hind end impudently across the face of the fast motor buses and matching at his openings like an open field runner or a hockey star on the move. There were times when I would have sworn his little yellow devil actually shrank to get through, but it got through and my breath came back. At the end I thanked him. These things were good for me, better than a medical examination. A heart long suspected of lack of interest in life had suddenly proved capable of as high exhilaration as that of a ten-year-old. It could take it. Henceforth life has little to offer in the way of thrills unless it be a ride on the flint of Sir Malcolm's Bluebird, or a few flips in the unsubstantial air with one of the fighting 300-mile Furies.

Protein Content Higher

Many Samples Of Western Wheat Have Been Tested

Higher protein content of western Canada's 1936 wheat crop than last year was disclosed in a report by the grain research laboratory of the board of grain commissioners, Winnipeg. Close to 800 samples of wheat from Manitoba, Saskatchewan and Alberta have been tested at the laboratory and the protein content is averaging two per cent. higher than last year.

Computed on a 13.5 per cent. moisture basis, the tests showed Manitoba wheat averaging 14.8 per cent. protein content compared with 13.2 per cent. last year. Saskatchewan samples averaged 16.3 per cent. compared with 14.4 per cent. last year and Alberta averaged 16.1 per cent. compared with 14.6 per cent. last year.

Not Very Long Ago

Boston Had By-Law Forbidding Bathing Without Doctor's Order

Cleanly Anglo-Saxons on both sides of the Atlantic have been shocked at the revelation, by an American plumber who has just returned from a European tour, that the Hohenzollern Palace at Potsdam contains 600 rooms, there are only two bath-rooms in it. And the plumber found, also in Germany, a castle of 260 rooms which had no bath-room at all.

But there was a time when the Boston city fathers passed a by-law forbidding anyone to have a bath except by doctor's orders, and this was not repealed till 1862. Again, just over 100 years ago, when the Lord Mayor of London asked for a shower bath to be installed at the Mansion House the request was refused, as "the need of same has not been heretofore complained of."—London Answers.

Air Derby Planned

Racers Expected To Make Atlantic Hop Next May

Air Minister Pierre Cot, in a telegram to the convention of the International Aeronautic Federation of Warsaw, announced an air race from New York to Paris on the 10th anniversary of Col. Charles A. Lindbergh's famous flight—May 21, 1937. Organizers of the race said a "blue ribbon of the air" would be offered to the winner, with the hope of attracting at least 20 racers.

"The Object of his Affections"

You sold it—Ogden's Fine Cut! Men who roll their own cigarettes have a yen for Ogden's, because Ogden's does roll a cooler, sweeter, smoother smoke. If you're not already acquainted with Ogden's, take a little tip—try this mellow, fragrant cigarette tobacco. Yes, sir, you'll like Ogden's Fine Cut and you'll like the way it's packaged, too—Cellophane wrapped with the purple easy-opening ribbon. Be sure to choose the better papers—"Chanticleer" or "Vogue".

OGDEN'S FINE CUT

P.S.—Your Pipe Knows Ogden's Cut Plug

Building Without Stairs

Will Have Ramps So Car Can Park On Any Floor

Hotels and offices in which cars can drive to any floor and houses with more than one floor, but no stairs, are being designed in London. The buildings will have ramps, like those in some large garages. The young designers claim that their plan will do away with traffic congestion, make it possible for dwellers to drive their own cars into the building and park them outside their doors, make roofs into car parks, and provide overhauled roads. The inventor is an architect, Dr. M. Hoenig. Already buildings on his principle are being put up in Leeds, England and in France. The Leeds building will contain a 150 bedroom hotel, a 170 car garage in the basement and a motion picture theatre. Cars can be driven right into the building, ascending to any floor.

Hundreds Of Suggestions

Lord Mayor Of London Receives Ideas For Memorial

Several hundred suggestions for a King George Memorial have been received by the Lord Mayor of London, and he and the King George Memorial Fund is considering them. Among them are renaming Trafalgar Square, King George Square, removing Nelson's Column and the lions to Tower Hill, erecting statues of King George and his four sons, and placing the Cenotaph in the centre of the square are some. A flood-lit Mausoleum in Hyde Park is another. The erection of a colossal flood-lit statue on the cliffs of England, near Leasolent, similar to the Statue of Liberty in New York, visible at sea for 20 miles, is still another.

Little Animal Has Courage

Man Tells How Gopher Rescued His Helpless Mate

The gopher, unassuming and somewhat ratty animal, attains heights of courage that merit him a better name, says A. D. Bain, superintendent of a chain of bungalow camps in the Canadian Rockies.

On a recent inspection trip, Bain saw as he approached in his car an injured gopher lying helplessly in the middle of the road. Nearby stood another of the little animals, bristling and showing his teeth, although obviously frightened.

When Bain stopped the car, the second gopher put its teeth into the scruff of his dying mate and dragged her to the safety of the long grass beside the mountain road.

After 400 years, one of the best-known "ports of call" along London's waterside, The Turk's Head Inn, Wapping, has been closed.

According to a correspondent of Collier's, an undesirable alien is a foreigner who makes more money than he does.

Marked Reduction In The Sale Of Canadian Wheat To Scotland Has Been Predicted

Scottish bakers who for generations have made bread by the long fermentation process are shifting gradually to the short fermentation method and the result may be a reduction of Canadian wheat purchases, Harry Miller, cereal technologist of the experimental farms, stated in a report to Hon. James Gardiner, minister of agriculture.

Returning from a study of milling and baking methods in Europe, Mr. Miller provided a summary of the results of his inquiries. He investigated particularly dough testing machines and chemical methods developed in Europe in recent years, so that in selecting seeds for plant breeders in Canada efforts may be made to meet these developments.

"While wheat from the Dominion," Mr. Miller said, "is recognized in Britain and the European countries as the best wheat grown, the principal factor to be considered so far as England, in particular, is concerned is price of the wheat."

The remaining 50 to 60 per cent may be made up of lower priced wheat from as many as 11 different countries. Judged by the standard of the Canadian loaf, the English bread is not as good.

"A different situation, however, prevails in Scotland. There the bread may be made of 100 per cent Canadian wheat and consequently the Scottish loaf is considered equal, if not better, than that made in Canada. While the Scottish baker, like other bakers, is naturally concerned with the price factor, the general custom for generations over there has been to make bread by the process of long fermentation, which improves the flavor of the loaf."

"To follow this process the highest quality of wheat flour must be used and Canadian wheat therefore is sought. But the short fermentation method, which is followed in most other modern countries, including Canada, is gradually being adopted in Scotland and if it ultimately becomes general the result may have an effect on that excellent market for Canadian wheat."

"Though France is a white-bread eating country little Canadian wheat is used, since its importation is greatly restricted. In Belgium the people eat white bread and about 50 per cent of the Canadian wheat is used in the manufacture of Belgian bread flour. They are convinced the wheat from Canada is as good a product as they can get anywhere. Practically the same situation prevails in Holland.

"In Germany rye bread is consumed to a great extent, this being made from the home-grown cereal. Most of the wheat flour used goes into the production of breakfast or morning rolls that are so well known to travellers on the continent. The larger breads are usually made from rye or wheat-rye mixtures. Scarcely any Canadian wheat finds its way into Germany at the present time. The national policy favors the use of rye bread and rye is grown abundantly in Germany and is a very productive crop."

Rats Devouring Crops

People On Tristan da Cunha Island Are Facing Ruin

The descendants of rats which swam ashore in 1882 from wrecks to lonely Tristan da Cunha Island, half way between South Africa and South America, threatened to bring ruin to the little island population and force them to move.

Officers of the British freighter Harma, which arrived recently at Durban, South Africa, on its way from South America to Japan, said the rats this year are devouring all the crops before they mature.

So ravenous have the rats become the officers said, that they are eating pages from the family Bibles of the islanders. There are five Bibles for each of the island's 157 inhabitants.

The fate of the islanders will not be known, probably, until next Christmas when a British ship makes its annual visit with mails and supplies—which this year will contain an extra supply of rat poison.

Anxiety is great because in 1929, when the potato crop failed, the islanders were on starvation rations when the Christmas ship appeared.

Night Driving Dangerous

Fifty-eight out of every one hundred deaths from automobile accidents occurred during dusk or darkness. The careful motorist drives only two-thirds as fast at night as he does by day. Poor visibility and failure to dim glaring lights while passing another vehicle are given as causes of most night accidents on the highway.

We have seven senses. Five of them will take care of themselves. Two need cultivating—common sense and a sense of humor.

Evergreen trees shed their leaves completely every three to five years, but the process is gradual and unnoticed.

Rare Plants Found

Unusual Floral Growth Discovered In Land Of Incas

Macchu Picchu, the only city of the ancient Incas that was not destroyed by Pizarro, still yields rare botanical findings, according to Dr. T. H. Goodspeed, director of the Botanical Gardens of the University of California.

As the result of a trip made to the Andes last year, some members of which have still remained behind and revisited the ruins of Macchu Picchu, over 5,000 specimens of floral growth and tobacco plants have been obtained and sent to the University of California.

Some of these already are growing in the botanical gardens of the university and samples of nearly all have been sent to Harvard University for further assistance in identification.

Macchu Picchu, the ancient Inca city from which many of these plants and flora came, is situated near the summit of the Peruvian mountain on which the Incas believed the sun remained chained during the day time.

It was discovered in 1912 by a Yale expedition under Hiram Bingham. With the exception of the missing thatch roofs, the ruins were in a state of perfect preservation. Its isolation is supposed to have been due to the fact that the Incas regarded the city as a place of refuge, and it is presumed a number of them assembled there to avoid Pizarro's flaming progress.

Near the city were found specimens of the famous calceolaria, growing to a height of nine feet, with enormous flowers and leaves. In its known garden forms, the plant rarely attains a height of more than two feet.

A rare orchid specimen also was found growing in an exposed position on the bare, granite slopes of the city, where usually the orchid is a parasitic growth on another plant.

Efforts will be made to cultivate both in California.

Was Object Of Curiosity

First Grain Elevator At Lakehead Seemed Too Large

An incident that recalls the inauguration of the export of wheat from Canada, occurred at Port Arthur, Ont., when the warehouse of the Gillespie elevator was destroyed by fire. The historic touch is present in the fact that the Gillespie elevator was the first warehouse of that kind built at the Head of Lakes, 50 years ago, to handle grain, while the portions to which the western grain industry was to grow and there was considerable incredulity as to the necessity of gigantic transportation and shipping facilities. Fifteen years later, however, about 1901, the importance of western wheat had been convincingly demonstrated. The tide of immigration was flowing impressively into Western Canada and the Head of the Lakes had become immensely important in the wheat trade.

Several gigantic elevators had been built by that time. If any one had ventured the opinion then that we would encounter a period when the fine Canadian wheat would be a drug on the market and owners of thousands of acres of splendid prairie wheat land would be reduced to a state of indigence, the popular verdict would have been that he was a dangerous pessimist who ought to be suppressed.

Forecasting the future of any industry is difficult. Nevertheless, the wheat trade has been down quite markedly but is now coming up. It is fairly certain that for some time the western wheat-growers are going to have a taste of business revival that will be decidedly welcome.—Welland Tribune.

Japanese Trade Penetration

Selling Coronation Momentaries In Britain In Large Quantities

"Union Jacks and other mementoes of the coronation made in Japan are creating alarm among British manufacturers. Accurate copies of British and Dominion flags, it is said, already are being sold in large quantities at prices 40 per cent below the British product.

It is estimated that £1,700,000 (about \$5,000,000) worth of flags and bunting will be bought for coronation displays next May. But if the present Japanese flood continues one-fifth of the trade will go to the Orient.

Scientists say that the chemical composition of the human body is worth less than a dollar, while Paramount Pictures have placed a value of \$5,000,000 on Gary Cooper. What's he got that we haven't?

The dynamo on the S.S. Queen Mary are capable of supplying light and power for a city of 150,000 inhabitants. 2167

Farming In The Argentine

Cultivated Area Confined Almost Entirely To Flat Plains

In view of the important position of the Argentine as an agricultural producer, and bearing in mind that the Argentine farmer uses the most up-to-date farm machinery, which is almost exclusively imported from Canada and the United States, a few facts regarding agriculture in the Argentine provide an interesting comparison with farming in Canada. The Argentine has an average of 48 million acres annually under cultivation in grain. Of this figure approximately 20 million acres are in wheat and 15 million acres in corn. The remaining 13 million acres are seeded in flax, barley, oats, and rye. There is an additional 14 million acres normally in alfalfa. This total of 62 million acres represents 98.4 per cent of all land under cultivation in the Argentine and may be compared with an average of 59 million acres under field crops in Canada.

The cultivated area of the Argentine is almost entirely confined to a compact section of the country which comprises an absolutely flat plain, originally without a tree or shrub of any kind, known as the Pampas. The land consequently lends itself admirably to farming operation on a large scale. For the most part the individual farmer grows both wheat and flax on his farm. In the south and west, wheat predominates, with a smaller acreage on some farms in oats and barley. Many of the large farms in the south and west grow only wheat year after year, as there is not sufficient rainfall to be suited to a flax, and there is danger too of an early frost. In the central and northern sections, wheat and flax are grown together, and from year to year may be alternated with corn. Again, alfalfa is occasionally sown at the expiration of a lease and the farm held by the landlord for grazing.

The average operating farm unit in Argentina is between 328 acres for farms growing corn, to an average of 378 to 500 acres for wheat and flax farms. There are, however, more than 16,000 grain farms (representing 43 per cent of the total acreage in grain, except corn) of more than 450 acres each, while 280 of these farm units have over 2,500 acres each. The Argentine is therefore a very large potential consumer of modern-type farm machinery adapted to large-scale farming operations.

Canadian Cheese

Large Market In Scotland For The Cheaper Varieties

The position of Canadian cheese in the Scottish market has interesting aspects, writes the Canadian Government Trade Commissioner in Glasgow. The Canadian product is recognized by the Scottish trade as the finest quality imported cheese of its type. The best-informed retailers are aware that when Canadian cheese is properly matured for seven or eight months, or longer, it has a sharp appetizing flavour approaching closely, if not in fact equaling, the flavour of the best home-produced cheddar. To the consumer seeking that kind of cheese, Canadian cheese is scarcely distinguishable from the home product and will fetch as high a price, say, one shilling per pound. It is difficult, however, under present circumstances for any but a small percentage of Canadian cheese offered on the Scottish market to be sold well-matured at a high price.

"Don is a delicacy," he replied, "and in time the fine quality of Canadian cheese will impress itself on the Scottish public to such an extent that it will be in greater demand for keeping and maturing.

The really large market for cheese just now is for varieties that can be sold cheaply to the vast number of people who use it for food rather than as a delicacy. It is possible that in time the fine quality of Canadian cheese will impress itself on the Scottish public to such an extent that it will be in greater demand for keeping and maturing.

A Great Advantage

Simon Cameron, a colonial statesman, was once asked why his son, who was both clever and popular and who had entered politics with all the family prestige and influence had not succeeded as well as he had. "Don is a fine fellow," he replied, "and will do well; but I started life with a big advantage over him."

"What was that?" he was asked. "Poverty," he replied.

Pilot Was Fortunate

An extraordinary escape was the good fortune of a pilot when his airplane stalled and fell between two bungalows in Rochford, Southend, England. The airplane's fall was broken by each wing resting on the roof of each bungalow. The pilot, Donald Wallace, Southend, climbed down from the cockpit with slight injuries to his head and face.

Take Opera To Arctic

Some of Moscow's most famous singers and ballet dancers and a first class theatrical company are taking the opera into the Arctic this season and arousing enthusiasm among the Northern Siberians who are seeing the glories of the theatre for the first time.

REBEL SHELLS CAUSE HAVOC AT SAN SEBASTIAN

Our photograph shows the damage done to houses in San Sebastian when the rebel ships shelled the famous resort from the sea.

Speed Means Danger

Unnecessarily Fast Driving Is Menace To All Traffic

High speed on the highways has become so common that sense of proportion seems to have been lost. There are few circumstances that require travel at sixty or even fifty miles an hour. The main occasion is the craze of the driver for making the journey in the shortest time possible. After he has put the lives of others in danger in the process he probably has plenty of time to idle away. That time could have been better spent in driving safely.

Other conditions being equal it is indisputable that the greater the speed the greater the danger. Unnecessarily high speed and recklessness are interchangeable terms. The authors of "Sense and Safety on the Road" assert that if the entire motoring population reduced speed to 20 miles an hour for a trial period the number of fatalities would decline in the proportion of thirty to one. It is not hard to believe. But it won't happen. It can't when the speed mentality has progressed so far as to suggest that the motorist who drives at twenty is next thing to a public enemy and should be dealt with as a criminal offender against the laws of safety.—Toronto Telegram.

Not Guaranteed

Demonstrator Said Stingless Bees Will Sting If Hurt

Henry Brown of Cape May Court House, N.J., took a hive of "stingless" bees to the Philadelphia Beekeepers' Association meeting.

He filled his hat with them and put it on his head. He placed them in his mouth. So convincing was his demonstration that others tried it. But it took four-year-old Hena Brown to prove they could sting. Brown said she must have squeezed the bees too hard in getting them out of her hair.

"These stingless bees are very gentle and low suffering," he said, "they, like the worm, will turn."

Puzzle For Postmen

Postal authorities in Kitchener, Ontario, finally puzzled this one out. A letter was received at the city hall with "Citterhoo" in the lower right hand corner, below the address. Authorities decided it was a newly-invented form for city hall.

The largest beetle in the 100,000 known species in the world is the brown Goliath beetle of equatorial Africa. It is about four inches long.

Cross Stitch These In Wool or Silk

PATTERN 5682

They're the best of friends—this bright cross stitch kitten and handsome bull-pup. And see what a charming pair they make as companion pictures! Effective in wool or silk, these bright accessories make ideal gifts or bazaar donations singly or in pairs. In pattern 5682 you will find a transfer pattern of a dog 6 1/2 inches and a cat 7 1/2 inches, material requirements, color suggestions, illustrations of all stitches needed.

To obtain this pattern send 20 cents in stamps or coin (cash preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

Signs Which Predict The Weather Are Not Reliable

Throughout last winter and this summer, the weather has displayed freakish tendencies. On one occasion, for a week or more in July last, there was a heat spell that shattered previous records and left its toll of sick and dead throughout the continent.

About this time, as the almanac used to say, the weather prophets tell us what kind of a winter we are going to have. There are the good-bone prophets, and those who observe the fur of animals and see other nature signs. Animals sometimes seem to have a kind of mysterious power to foresee weather developments not visible to human eyes.

Some weather signs appear merely fantastic, like the supposed appearance of the groundhog on February 2. Also, the theory that the weather for a month is patterned after some particular day at the close of the preceding month.

Many persons regarded it as possible that nature in some unaccountable manner does provide for her creatures by giving them thicker coats of fur with which to meet a hard winter. It would seem a more likely theory that a thick coat of fur is the result of a summer during which the animal food has been abundant.

If there are plenty of nuts, you can expect the squirrels will look very prosperous and silky. They will strut around as proudly as the hand-some damsels with the beautiful new fur coat. But if the summer has brought drought, the nuts will fail to mature, and Mr. Squirrel and his fur look poor and stunted.

The heat of the sun, the moisture of the air, the rotation of the earth, are strange and mysterious forces that largely shape our weather. Who can tell what they are saying to us about next winter or what storms and sunshine they are planning in the heart of great oceans, or in the icy solitudes of the poles?

The Bible says the wind bloweth where it listeth. It does not seem to tell us much in advance which way it is going to blow. Perhaps some day we shall learn its secret.—Sarnia Canadian Observer.

Have Their Problems

Single Workers On Small Salary Must Budget Carefully

Conditions under which lower-paid single women live in London are described in "Consider Her Palaces," a six-penny pamphlet published by more than 30 associations.

It is recommended that the minister of health should inquire into the desirability of recognizing single working persons as a class for whom housing provision should be made with state assistance.

About 230 women were included in the inquiry, few averaging as much as \$10 a week over the year. It was shown that rarely does the use of a scullery go with a room below \$5 a week in any part of London, and keeping clothes clean is an urgent problem for the underpaid woman.

Cooking is usually done on a gas ring in the room. Water is often carried three flights of stairs. In very large number of cases there is no bath.

Holland Honors Queen

Wilhelmina Of The Netherlands Celebrates Her 56th Birthday

Queen Wilhelmina of the Netherlands, celebrated by a long holiday in Switzerland, has observed her 56th birthday anniversary at The Hague, Holland.

Flags were unfurled throughout the city in her honor, but there was little time to make celebration for the queen who has been on the throne nearly 46 years, retaining her dyke-bound kingdom of 8,000,000 subjects and her colonial empire of 60,000,000 subjects through all the years when many crowned heads were falling.

Ended Abruptly

The utopian picture of a mouse and a sparrow living happily with two poisonous snakes ended abruptly at Bockle's Nest, where the rodent and bird were found dead. No one saw them die, so no one could say whether the copperhead or the rattlesnake had bitten them after living in the same cage for three months.

Canada's Wool

Practically all the wool marketed co-operatively in Canada is handled by the Canadian Co-operative Wool Growers Limited. The company operates in each province through the medium of 18 sheep-breeder and wool-growers' associations, and stores, grades, and markets the wool received from its 7,100 patrons.

The three tramps had broiled a chicken, and they were arguing over the equitable division. Peter suggested they toss a coin. "Head!" said Sam. "Tail!" called Tom. Pete laughed. "Okay! I'll take what's left."

Canada had every reason to be interested in the new British empire, for it was largely of her creation. Lord Tweedsmuir said in an address to the Canadian club in Vancouver.

He traced empire growth to the days of its present conception and asked of its future course.

On one point it must get its ideas clear, its security in a distressed world and what contribution it could make to that international peace on which depended the security of civilization.

"I see no hope in the ideal which attracts some people—that of a compact and self-contained empire, with a common defensive system under which the whole would guarantee the security of every part. There would be enormous difficulties in the way of framing such a system, and even if it were achieved it would not meet the difficulty. For the British empire, potent as it is, is not potent enough to stand alone in the world."

"I think this is generally realized, and that is why Britain and the Dominions have from the start labored to secure, through the League of Nations, a system of world-wide collective security."

"That is a great ideal which we must never relinquish; but it is clear, I think, that the original League of Nations was devised on too ambitious lines. We tried to create something full-born and complete, instead of something which could develop slowly. It was meant to be a world system and a coercive system; but the absence of the United States from the start made it from the start an imperfect structure with a far too cumbersome procedure. I think it is generally agreed that some revision is necessary, and that for the present the league will have to be organized more modestly."

He said that the world state of a world state for a clearing house for consultation and discussion. That is not what we once hoped for, but nevertheless such an organization would be of the highest value in clarifying the minds of the world, in mental confusion far often than in malevolent intention which leads to war."

"It would not be proper for me to enlarge on this matter, or on what regions of agreement and disagreement may be necessary as intermediate machinery before we can attain a true internationalism. For no country today can afford to be without a foreign policy. We in Canada are no exception. We have the Pacific at our door, and beyond the Pacific are many difficult problems awaiting settlement. The world has shrunk today and there is no part of the globe which can say that its geographical position renders it immune from danger."

"What exactly does the British empire mean today?" asked His Excellency in his opening remarks. "The empire means to me the idea of sovereignty states—no more and no less. I wonder if you realize how great a part Canada has played in its making. I think it may fairly be said that our country has been the first to be fore-shadowed by Sir Wilfrid Laurier, then emphasized by Sir Robert Borden during and immediately after the war, and finally supplemented by the work of the late prime minister of Canada at the 1926 conference. Canada has every reason to be interested in the new empire, for it is largely her creation."

Necessary To Get Shell Producing Material Into System

A four-pound hen laying 150 eggs in one year produces enough egg shell to equal about half her body weight. To do this, she must get shell producing material into her system, assimilate it and transfer it to the egg shell. Shell producing materials are calcium and phosphorus, obtainable in oyster shell, limestone, grit, calcite, and bone meal. To a certain extent lime is present in meat scrap, milk, and the grains which make up the ration, but not in enough quantities to take care of the needs of a heavy laying hen.

Only One Complaint

A Swedish farmer who wanted to make his permanent home in this country appeared for his naturalization papers.

"Are you satisfied with the general conditions of this country, Mr. Olsen?" he was asked.

"Yah, sure," answered Olsen. "And does this Government of ours suit you?"

"Well, yah, mostly," stammered the Swede. "Only I lak to see more rain."

Regulations For Egg Export

Eggs for export from Canada in future must bear, as a grade stamp, a maple leaf and the words "Canadian Eggs—Government Inspected." These provisions were laid down in new regulations drafted under the Livestock Products Act. The regulations also require that after eggs have been removed from the cases bearing such government stamps, the marking must be obliterated by the person who removes the eggs.

Pools and the Marketing of Grain

The country elevators use the present marketing system because experience and numerous investigations have proved it to be the best and cheapest way of handling and marketing Canada's wheat.

The Western Pools, who are members of the Winnipeg Grain Exchange, state that they use its facilities because they have no other alternative. They have other alternatives. They could:

- Sell direct to Canadian exporters;
- Sell direct to overseas millers;
- Sell direct to overseas importers;
- Establish their own Pool Exchange.

They do none of these things, because they know that the open market, of all systems tried to date, affords the farmer the best price and the best protection. In other words, they use their memberships in the Winnipeg Grain Exchange in the same manner as the other country elevator companies use theirs, and for exactly the same reasons.

It may be that some better system can and will be evolved by conference, investigation or experiment. If any other system of marketing which will prove of greater benefit to the farmer can be evolved, it will receive its earliest and strongest support from the elevator companies whose pride it is to have been in the vanguard of service to the farmers of the West for more than thirty years.

The North-West Grain Dealers' Association
WESTERN GRAIN DEALERS' ASSOCIATION

Splendid Addresses at Teachers' Convention

(Continued From Page One)

seem to lie with the school teacher. Nothing denominational, but simple instruction in Bible reading and in the teachings of Jesus would prove invaluable, was the thought of the speaker as he urged consideration for the passing of such a resolution.

J. S. McCormick, chairman of the School Board, extended a welcome on behalf of that organization.

E. C. Baldwin, president of the association, spoke of the present transitional period, of the members of the teaching profession who have attained high positions in the province, and the legislation which has been passed. He, too, placed before the teachers the importance of inculcating in the minds of their students a high standard of ideals.

Give Details of Defects
Miss L. G. Allyn of the Red Deer Health Clinic read an interesting paper and presented a report giving figures on defects found in pupils in the Clinic area, with special reference to the large percentage of children with defective vision, teeth and tonsils.

Dr. McCullough of the Provincial Training School, Red Deer, went into some detail concerning measuring human ability. We are living in a scientific age when crude measurements will not answer, he said, and gave a resume of the evolution of mental testing. Today, he claimed, there is a tendency to over-estimate the ability of the sub-normal and under-estimate the ability of the gifted child. He spoke of the value of the I.Q. test for the young child. If the child does not meet the test, then thorough investigation ought at once to be made to determine whether he is sub-normal or whether he is a victim of unhappy home life or social relations.

Studies and Demonstrations
"Social Studies and Enterprise Demonstration" and Discussion of Division 2" were subjects very capably and interestingly handled by Miss M. McLees of Rimbey and E. Castella of Innisfail.

Former Inspector W. J. MacLean, who was present at the noon banquet, was the subject of complimentary remarks by Chairman Mr. Baldwin, who also presented him with, on behalf of the teachers, a small gift as a token of appreciation of his services in the cause of education.

An enjoyable dance on Thursday night put a pleasant ending to the first day's session.

The association members wound up their deliberations on Friday afternoon by passing four resolutions, the first of which was as follows:

"Whereas the records of Juvenile Courts show delinquency to be increasing and whereas this matter strikes at the very root of our efforts as teachers to produce good citizens, therefore be it resolved that this convention go on record as being in favor of introducing to the class room definite ethical instruction based on the Life of Christ."

Favor Library Grant
The second resolution asked that the Department of Education return to Alberta schools the library grant, in view of the need of reference books to teach the proposed new course.

The third resolution requested that the Department allow Grade 9 pupils to write examinations on such units as they have been able to prepare, in cases where they have been unable to receive instruction in the full grade.

A presentation to the teachers by a representative of the A.T.A. of a full financial report and a budget plan of the coming year's expenditures, to be given at the 1937 convention.

tion, was the text of the final resolution.

Elect New Officers
A slate of officers for the ensuing year was elected as follows:

President, Howard Stringer, Great Bend; vice-president, L. Massing, Rimbey; secretary, Miss M. Graham, Red Deer. Executive committee, Miss Ruth Craig, Mr. Cassando, Miss V. Pratt, Miss B. Watson, D. A. Ure and the Red Deer Public School staff.

Last year's Sports Committee was re-elected with the addition of two more and now comprises E. Kelly, G. Finlay, G. W. Dawe, D. A. Ure and H. Stringer.

Some dissatisfaction with the former method of awarding prizes at the sports meet was expressed and it was agreed to leave a re-arrangement of this with the Sports Committee, and to ask the association to donate \$25 to the sports fund.

Former Inspector W. J. MacLean recounted some of his experiences while attending the world's Olympic Games at Berlin and compared facilities there with those at Los Angeles.

Speaks on A.T.A.
H. D. Ainlay, Edmonton, speaking for the A.T.A., went into some detail regarding the new set-up of the larger units, of which he said nine would be established in the southern and eastern part of the province this fall. At the close of his talk eight locals were formed, as follows:

Delburne—President, D. Ure; Secretary, N. Ray.
Eckville—President, E. C. Baldwin; secretary, Miss G. R. Craig.
Red Deer—President, J. E. Welsh; Secretary, H. Dawe.
Lacombe—President, Miss L. McClary; secretary, Miss Jessie Hay.
Rimbey—President, M. Rimbey; secretary, Miss E. Stuart.
Clive—President, V. Winter; secretary, Miss Watson.

Silvan Lake—President, G. Paul; secretary, Miss G. Simpson.
Rocky Mountain House—President, H. B. Cassan; secretary, Miss Durnford.
Inspector L. A. Thurber recounted his experiences in the large unit which was established in the Youngstown district several years ago, of which he was in control, and which he found worked out very satisfactorily. The expense of operating the unit had been only half of the cost under the old system.

J. M. Scott of the Normal School, Calgary, demonstrated Social Studies for Grades 7, 8 and 9, taking as his subject Japan, and worked out various phases of Japan's problems.

Miss M. C. Anderson, Hanna, very ably handled an enterprise demonstration and discussion, Division I, using as her subject, "Building a Town."

Lincoln

LINCOLN.—Owing to the good roads and nice weather, the annual chicken supper and dance which was held in the hall last Friday evening was a huge success, and although the ladies had prepared a large supper, they were not able to cater to such a large crowd. Mr. John Bradley held the winning ticket for the quilt.

Mrs. Harry Proudfoot and son Vernon have been visiting with Mr. and Mrs. McGeechay for the past two weeks.

Jack Ross and Mrs. J. Ross were week-end visitors at Camrose.

Mr. and Mrs. G. Gilbert spent the week-end with Mr. and Mrs. A. Saunders.

Mr. and Mrs. C. Carter had some friends and relations staying with them last week.

We are sorry to hear that Mrs. Dan Wilson is on the sick list.

Our teacher, Miss Rice, attended the Teachers' Convention in Lacombe last week.

Mrs. Swanson from Saskatchewan has been attending her father during his illness, and friends will regret to learn he died on Monday last.

Policyholders Own the "Assets" of Life Insurance Companies

As a great co-operative enterprise, Life Insurance has built up Assets in Canada totalling, approximately, two billion dollars. Yet these Assets are relatively small when it is realized that they are jointly owned by about 3,500,000 policyholders—one-third of Canada's population.

On the average, each policyholder owns \$571 as his share of the total Assets in Life Companies operating in Canada. Obviously, the great majority of policyholders are men and women of ordinary means—thrifty people who, year by year, have entrusted to Life Insurance part of their savings so that they may have financial security against the uncertain future.

These policyholders represent the best type of Canadian citizens. They have sought to preserve their financial independence, and,

as thrifty citizens, neither they nor their dependants are ever likely to become charges upon government or municipal relief.

To protect the interests of these 3,500,000 Canadian policyholders, Life Insurance Companies have invested their Assets in government and municipal bonds—in first mortgages—in public utilities and industrial enterprises—and in other authorized securities.

The soundness of the Investment policy of the Companies has been tried and proven during periods of severe financial stress. Governing and corporate bodies in which policyholders' moneys are invested have, until recently, maintained the integrity of their obligations. This has made it possible in turn for the companies, in their capacity as trustees for the policyholders, to fulfill every obligation guaranteed by their policies.

Now, however, there is a growing tendency to repudiate, by legislation, public and private debts, regardless of the debtor's ability to pay. Legislation which tends to destroy the ownership of public and private property places an unjust burden upon life insurance policyholders.

Bentley

BENTLEY--Mr. Robert Woolgar, Charles and Florence motored up to Edmonton on Tuesday, returning the same day.

The United Church observed the harvest on Sunday evening last, the church being nicely decorated with the products of the district. Rev. Mr. Warren gave a very appropriate address.

Mr. Glen Wright was a business visitor in Edmonton on Thursday. Mrs. Wright and Rowena accompanied him and will make a short visit at Ponoka with Mrs. Harris, Mrs. Wright's sister, while away.

Mr. Wilkie, intermediate teacher, and Miss Skodopole, primary teacher of Bentley's schools, attended the Teachers' Convention in Lacombe.

'Love Before Breakfast' Comes to Avalon Theatre

At the Avalon Theatre in Lacombe on Thursday, Friday and Saturday of this week, "Love Before Breakfast," a farce comedy starring Carole Lombard, is the first of a fine double-feature bill.

Carole Lombard's performance in this film is really grand. She is tramping every foot of the way. A swell comedienne, she takes with gusto her black eye, her drenching with water and all the tumblers. She gives her part everything, whether exquisitely gowned by Travis Banton or dressed in a bathrobe with her bare feet in mustard water.

Preston Foster, as the pursuing millionaire, also scores decisively in this, his first farce role. He displays an amusing light touch that will win him many new admirers among the ladies of the audience.

Gene Autry, the melodious cowboy, stars in the other feature on the twin bill--"The Singing Vagabond." It's one of those hard-driving western films, with action from start to finish.

CHRISTIAN SCIENCE

At all Christian Science churches

next Sunday, the subject of the Lesson-Sermon will be "Doctrine of Atonement."

The following is one of the Scriptural Quotations contained in the Lesson-Sermon:

"Wherefore seeing we also are compassed about with so great a cloud of witnesses, let us lay aside every weight, and the sin which doth so easily beset us, and let us run with patience the race that is set before us. Look unto Jesus the author and finisher of our faith; who for the joy that was set before him endured the cross, despising the shame, and is set down at the right hand of the throne of God" (Hebrews 12:1, 2).

One of the correlative passages from "Science and Health with Key to the Scriptures," by Mary Baker Eddy, is as follows (page 19):

"Every pang of repentance and suffering, every effort to reform, every good thought and deed, will help us to understand Jesus' atonement for sin and aid its efficiency; but if the sinner continues to pray and repent, sin and be sorry, he has little part in the atonement--in the atonement with God--for he lacks the practical repentance, which reforms the heart and enables man to do the will of wisdom."

Popular Couple Are Married at Bentley

BENTLEY--The marriage of Miss Eldena Leiske, daughter of Mr. and Mrs. Huldreich Leiske of Gull Lake district, and Mr. John Wentz was solemnized at the Adventist Church on Wednesday, Oct. 7, at 2 p.m., Elder Dyer of Calgary officiating.

There were about 15 people present in the prettily decorated church. The bride made a pretty picture in her dress of white satin with

wreath. Miss Evelyn Reuchler, cousin of the bride, was bridesmaid and looked charming in her dress of salmon pink crepe de chene. Both carried bouquets of pink and white carnations and ferns.

Mr. Ellsworth Leiske, brother of the bride, supported the groom. Mr. William Wetzel played the wedding march and during the signing of the register she sang "I Love Truly" with Mrs. Norman Taylor of Lacombe as accompanist.

Following lunch one of the bride's slippers was secured and passed to the guests, who each placed a piece of money in it and the collection was returned to the bride with her slipper.

A host of friends wish this popular young couple a long and happy life together.

Had Struggle With Grizzly

Mountain Climbers in Rockies Attacked by Mother Bear

The story of a struggle with an enraged mother grizzly bear protecting her cubs in interior British Columbia was related by Mr. and Mrs. Don Munday, Alpinists who returned to Vancouver from an exploration trip in the Coast Range.

As they completed a hazardous passage through a 12-foot cleft in Bearpaw canyon, Mount Silverthorne, the Mundays related, they looked down on a grizzly cub standing apparently alone.

Discarding their ice-axes, they focussed their cameras on the cub but before they could take a picture the roar of the mother grizzly distracted their attention.

She was standing on the same ledge as they, 30 feet away.

Unarmed, the Mundays began to yell, but the mother bear started her advance. About a yard away she swerved off but came back a moment later more fiercely than ever.

Finally Mrs. Munday succeeded in recovering one of the axes and, as the bear made a rush at Mr. Munday, causing him to trip, she rushed at the bear with up-raised axe and drove it off.

Eggs In South Africa

Best Are Exported And High Price Charged For Culls

A subsidy of 3s. 4d. is paid by the Government to the egg merchant for every thirty dozen eggs that he exports, and the South African housewives who live in the towns are forced to bid against each other for the eggs that are left.

Only the best quality eggs are exported, and only about 30 per cent. of the South African eggs are of export quality. These eggs fetch approximately 1s. 3d. a dozen in London, while the South African housewife has to pay from 1s. 9d. to more than 3s. a dozen for the eggs that are presumably not good enough to export.

She has not even the consolation of knowing that the subsidy is helping the farmer, for it goes to the exporting merchant. The result is that eggs are now being imported from Holland at 1s. 7d. a dozen, of which 41s. is paid in duty at the ports. Thus the price is raised against the townswoman by the double (and Gilbertian) expedient of importing eggs.—Johannesburg Times.

Plant Out Of Place

A weed may be described as a plant out of place; by its unsightly appearance, its pernicious habits of growth, method of spreading by root stalks and seed, it becomes a real menace to agriculture regardless of whether it is growing on private property, highway, public or private grounds.

Notable Pupils

Interesting Record Compiled Of Names On School Wall

A. C. Baker, school clerk of famous Eton since 1909, who has arranged for hundreds of boys to be flogged on the birching block, has retired on pension.

At his office just off school yard he said many of the boys who have been flogged in his time are now famous, and some occupy prominent positions in the government.

"It was one of my duties," he explained, "to see that boys reported to the headmaster for a flogging which they had been awarded this punishment."

Years ago Mr. Baker began the tremendous task of making a record of all the names of boys carved on the walls of upper school and the adjoining staircase.

This work he has at last finished, and he has presented a bound volume containing 18,000 names to the headmaster, Claude Elliott, and another copy to the school library. Some of the names go back to the 16th century.

"It was a most fascinating task," said Mr. Baker. "I found the names of Gladstone, Shelley and Peel, and in more recent times those of the Duke of Gloucester, King Leopold of the Belgians, the ex-king of Siam, Anthony Eden, and G. O. Allen, the cricketer."

"I found more Smiths than any other name—they total 145. The Campbells come next with 91, then are the Scotts 62, the Wilsons 54, and the Hamiltons 53. The 29 Gossings all have their names cut together in one group."

"Every letter in the alphabet is represented, even Z with a solitary entry."

"This carving of names began shortly after the foundation of the college by Henry VI, and it became such a common practice that a few years ago the authorities officially recognized it."

"Nowadays boys who wish to have their names carved on leaving Eton pay a fee of 10s. (\$2.50) to have the work carried out by skilled craftsmen."

The headmaster, making a presentation to Mr. Baker on behalf of the staff, said that Etonians all over the world would learn, with regret, that the school clerk was retiring.

Became Great Novelist

Peasant Girl Once Forbidden To Learn To Read Or Write

Gratia Deledda, who died in Rome at the age of 61, was a peasant girl who became a prosperous novelist although her parents forbade her to learn to read and write. Signora Deledda won the 1926 Nobel Prize for literature with her novel, "La Puga in Egitto" (The Flight Into Egypt).

Born in Sardinia, the girl was destined for a life in the fields. However, at the age of eight, she found a book. Anxious to know its contents, she went secretly to the home of the village schoolmistress and learned to read and write.

Four years later she sent a composition to a Rome newspaper and received 50 lire. Her parents, surprised that she could make money by writing, went about educating her. By her eighteenth birthday she had written and published a novel.

She was almost unknown, however, outside her own country when she won the Nobel Prize nine years ago. Years before, however, she had had a sudden popularity in America through the support of William Dean Howells, who said she was a model for American novelists.

She wrote fifty novels. She was one of the "regionalists" and most of her work was about her native Sardinia. The winning of the Nobel Prize gained her a place in the Academy of Immortals which Mussolini created in 1926.

Campaign Still On

The campaign sponsored by the provincial Department of Natural Resources to lessen the number of crows and magpies in Saskatchewan is still being waged; two hunters at Regina Beach recently shot 58 crows, obtaining two bands for which the Government will reward cash prizes.

Letters Being Censored

Letters addressed to Spain, it is learned in London, are being opened and censored. Correspondents therefore are advised to avoid incautious comments which might prove dangerous to the people to whom the letters are addressed.

Always a lover of beauty we are working upon motorizing glasses that will enable you to look at the landscape without seeing the hot-dog stands.

A Hartford, Conn., luncheon advertisement: "Don't divorce your wife if she can't cook. Eat here and save her for a pet."

Was Once Zulu Queen

Aged Woman Now Lives in Rhodesia On Small Pension

Wise, bent and poorly clad, but not without traces of royal dignity, a one-time queen has been flogged to a native missionary conference at Bulawayo in Southern Rhodesia. Her name is Macabose, once one of the superior wives, or queens, of Lobengula, last King of the Matabels.

A little over 40 years ago the slightest whim of Queen Macabose was law to whole regiments of plumed warriors. Today, with a middle-aged daughter, she lives on a small pension granted by the Rhodesian Government.

Behind her faded but imperious old eyes and deeply furrowed face are memories that would make a score of books.

It was to Queen Macabose's father, Gungunyana, that Dr. Jameson made his famous journey in 1891 through forest and swamps to secure a concession over Gasaaland to obtain a seaboard for what is now Southern Rhodesia. Dr. Jameson obtained the concession and permanently undermined his health in so doing, but the Imperial Government turned it down and today Rhodesia remains an inland State while the Portuguese rule over Gasaaland.

The days of native wars, raids for women and cattle, the ritual execution of wizards, and the barbaric splendour of the last great Bantu warrior-king, died with Macabose's husband. Today her chief interest is the spread of Christianity amongst the black races who were once the subjects of Lobengula—the Terrible in War.

World Speed Record

Made By Stream-Lined Jubilee Express In England

The stream-lined silver Jubilee express of the London and Northeastern railway, running from Newcastle-on-Tyne to London, established a new speed record for British trains by reaching a maximum speed of 113 miles an hour.

The train, excluding the engine, passengers and baggage, weighed 270 tons. The figure is believed to be a world record for a stream-lined passenger train.

The porpoise devours its own weight in fish about every 48 hours.

You'll Crochet Your Way to Flattery

Crochet your way to inexpensive flattery with this fetching, easily-made blouse of colored yarn. And if it's a smart "two-piece" your wardrobe needs, order pattern 5333—a trim skirt of plain crochet. This engaging blouse will fit gracefully in open or closed stitch is made entirely in the simple lace stitch shown in the detail. Quickly made—this outfit! In pattern 5679 you will find instructions for making the blouse shown with long or short sleeves in sizes 16-18 and 36-40 (all given in one pattern); an illustration of it and of all the stitches needed; material requirements. Price 20 cents. In pattern 5333 you will find complete instructions for making the skirt shown in sizes 16-18 and 36-40 (all given in one pattern); an illustration of it and of all the stitches needed; material requirements. Price 20 cents. To obtain these patterns send 20 cents each (40 cents for both) in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

The famous Edmonton "Grads" basketball team, generally conceded to be the finest aggregation of female basketball players in the world, has just returned to Canada after a successful "invasion" of Europe and the Mother Country. Standing on the deck of the "Empress of Britain" as she docked at Quebec, the members of the team are (front row, left to right), Helen Northrup, Doris Heale, Babe Belanger and Elita Dann. (Back row, left to right), Sophie Brown, Mabel Blanton, Gladys Fry, J. P. Page, the well-known manager of the team, and Noel Macdonald. The girls are wearing their Olympic blouses.

YOUTHFUL CHAMPION

This trim 15-year-old miss, Margaret Eason, who hails from Roseton, Saskatchewan, is Saskatchewan's woman golf champion. She defeated a number of prominent players to win the title and is believed to be the youngest champion in Canada.

More Umbrellas Lost

New York Subway Company Auctioned 2,000 Recently

The old joke about carrying off the wrong umbrella is not half so "funny" as the fact that approximately 2,000 umbrellas are left by their owners every year in the trains of a single subway system in New York.

The other day the company auctioned off 2,000 umbrellas, which had accumulated in its lost and found department in the past two years.

Among the other lost and unclaimed articles which went under the hammer at the same time were jewelry, suitcases, a great number of eyeglasses, a case of sporting goods and musical instruments, an assortment of false teeth and a collection of religious articles.—Detroit Free Press.

Saccharine is 500 times as sweet as sugar.

Canadian Small Meat Eaters

Average For New Zealand And Australia Much Higher

The average Canadian family uses three times as much milk as the average New Zealand family, but, on the other hand, it uses less butter and cheese and only about half as much meat.

Although the people of this somewhat cold northern country would really be expected to eat a good deal of meat, the average amount consumed per person is only 137 pounds a year, while the average used per person in New Zealand and Australia, both with balmy climates than Canada's, is 247 pounds and 213 pounds respectively.

Our Antipodean cousins should be good at heavy work and at sports that test the athlete's strength.

The above facts are taken from statistics published by the New Zealand government, which also show that New Zealanders butter their bread more thickly than do the people of Great Britain, Australia or Canada, but that when it comes to eating cheese our friends in Britain take first place.

The average consumption there is 9½ pounds per year, as against 3½ in Canada.

We eat only half as much beef, relatively, as the people of Australia and New Zealand—though only a little less than those in Britain—and we eat only a fraction of the amount of mutton and lamb consumed in the southern dominions, but Canadians are fond of pork, ham and bacon.

We eat 75 pounds per person, as against 17 pounds in New Zealand, 19 pounds in Australia and 46 pounds in Britain. Canadians also have a taste for poultry and eat a good deal more than the New Zealanders.

Just how we compare in regard to potatoes and spinach the story does not tell.—Winnipeg Free Press.

Air-Conditioned Rooms

Will Definitely Ensure Better Work In Hot Weather

You can do better work in an air-conditioned room in hot weather. You can not count on such a room to reduce colds at any season.

These are applications of air conditioning to normal life, presented at the Harvard biennial celebration in a symposium on environment by Philip Drinker, professor of industrial hygiene at the Harvard school of public health.

"Will we have fewer colds," Prof. Drinker asked, "if we control the humidity in our homes, if we ionize the air, or if we sterilize it with ultra-violet light? It would be pleasant to answer these questions positively, but at the present time there are no data from any source which we have seen, which justify affirmative answers."

Ownership Not Known

No Rent Paid For Six-Flat Building In Chicago

For at least 10 years, 81-year-old William Hyde told Judge McCarthy none of the tenants in the six-flat building in Chicago where he lived paid any rent—because nobody knew who owned it.

But Mrs. Delphina Lance charged Hyde posted as the owner and tried to have her evicted for non-payment of rent.

When Hyde admitted he was not the owner and didn't know who was, Judge McCarthy fined him \$100 and ordered an investigation of the mystery building.

A man received notice to vacate from his landlord. Believing it could not be enforced, he replied immediately: "Dear sir, I remain, 'Yours truly.'"

Social Justice

Reorganization Of The World's Economic Life Seems Necessary

The forces which are driving the world towards closer integration must prevail, unless the whole fabric of our civilization is to collapse and another Dark Age to ensue. As has already been shown, the political tensions which are now becoming intolerable are to a large extent economic in their origin. They are the outward and visible signs of the unworkableness of the present system.

They indicate clearly enough that an economic world-war, in which every man's hand is against his neighbor, is leading to inevitable disaster.

To escape the fate which now threatens is not impossible, but it can only be done on one condition—that there is a general will to escape.

If nations wish to work together to find a way out, a way out will be found. If they prefer to allow political hatreds to guide economic policy, if they elevate the ideals of acquiescence or passiveness above that of social justice, then there is no way out.

The real decision which now confronts the world is one of values. There can be no social justice without peace. The moral and military ideals are totally incompatible.

Higher ethical and cultural standards can only be developed by social and economic progress, to which war is an insuperable bar. Under modern conditions the belief that prosperity can be promoted by conquest has been shown to be an illusion. Victory can only be had by undermining the moral, social and economic foundations of our civilization.

The world is still struggling to avoid the abyss to the brink of which it was brought by the last great war. A repetition would engulf it irretrievably. But, on the other hand, peace is not possible without social justice between nations and between individuals. Those who believe it to be unattainable under the present constitution of society or under the existing international order are liable to become rebels against them. Only through an equitable organization of the world's economic life can peace and justice and freedom be made secure. For that, the narrowest of narrow interests for the sake of wider objectives will be necessary, for the principle of equality is inconsistent with privileges, whether exercised by nations or private interests, at the expense of the general good of the world community.

Unless there is a consciousness of moral solidarity among nations corresponding to the material interdependence by which they are now so closely tied together, the task of reconstruction is impossible. But if they are inspired by the firm resolve to banish warfare in all its forms, whether political, military or economic, a far better and juster civilization than any that it has known is well within the compass of humanity.

—From report of Harold Butler, Director of the International Labor Office.

Working To Music

English Motor Company Finds It Creates Cheerful Atmosphere

Music has many uses outside of the field of amusement and entertainment. It has been said that music has the power to soothe the savage beast, but it also has the power of minor chords will cause a ferocious lion to turn tail; that music at the proper tempo will induce pupils in school to do better work.

The Standard Motor Co., Limited, Canada's largest automobile manufacturer in that country, has found that the broadcasting of music in part of their factory has had a beneficial effect on the spirit of the workers, has created a cheerful atmosphere, and has caused no deterioration in efficiency and careful workmanship.—Oshawa Times.

International Trade

Australian Publisher Believes It Best Prevention Of War

The best prevention of war, Sir Keith Murdoch said in an interview at Montreal, would be a loosening of trade barriers and a general move to make international trade more easily possible. The Australian publisher, on his way home after a trip through Spain, France, Germany and England, said "some of the best brains in England are working on a policy of bank credits for nations which are hard up and the freeing of certain channels of trade in the hope there will be a substantial revival of trade by this means."

Expected Too Much

She said dreamily to him: "Yes, I could love a poor man." He asked her: "Then why not marry me?" She dreamily continued: "But I could not love a poor man enough to have the alarm clock wake me out of pleasant dreams to get up and make his coffee and fry an egg before he went to work every morning." And he said rudely: "Who said anything about there being an egg to fry?"

City Of The Future

A city of the future, designed for airplane and automobile commuters, with streets radiating from the centrally located airport, is envisioned by Dr. Ludo L. Zimmer, noted industrial engineer of Cleveland, Ohio.

WASHES DIRT AWAY
—no rubbing and scrubbing

Cleaning jobs are quick and easy with Gillett's Pure Flake Lye. Use a solution of 1 teaspoonful dissolved in a quart of cold water. Off comes the dirt! And you do no hard rubbing. Use it for toilet bowls, too—and to clear sluggish drains. It kills germs, destroys odors. Never harms enamel or plumbing. Get a tin from your grocer—today!

Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—The handy Gillett's Lye Booklet shows how this powerful cleanser and disinfectant can save you hard work... contains complete instructions for making soap at home... tells how to keep farm equipment and buildings clean and sanitary. Be sure to send for free copy. Just write: Standard Brands Ltd., Fraser Ave. & Liberty St., Toronto, Ont.

Sensitivity Of The Eye

Human Eye Becomes More Sensitive In Darkness

The sensitivity of the human eye to light was declared by Dr. L. A. Riggs of Clark University to be 10,000 times greater in darkness than in daylight.

Dr. Riggs discussed his pioneer work in measuring the sensitivity of the eyes of frogs, which he will report before the 44th annual meeting of the American Psychological Association at Dartmouth College.

In general, Dr. Riggs said, the same reactions he found in the animals were true of human beings. The eye of man is, however, more speedy in adapting itself to darkness and many times more sensitive than a frog's eye, he added.

The scientist discovered the lightning-like action of the process of seeing by measuring the extremely small electric current generated by light in the nerves of the eye.

"Every time we look at anything a tiny electric current is developed by the light-sensitive nervous structures within our eyes," he explained.

"We have measured the amount of this electricity developed by a light in the eye of the frog. When a frog is kept in total darkness for several hours the eye becomes 1,000 times as sensitive as it was in daylight, and when a light is flashed on it, the electric currents become very much greater. In human eyes the increase in sensitivity is about 10,000 times."

"We have all experienced the same thing at night, when the striking of a match produces a blinding light which would hardly have been noticed in the daytime."

We are told of a machine with a human brain. And then there are humans with the brains of machines!

Clive

CLIVE—L. W. Ditzler and wife spent a few days in Calgary last week.

The road from Clive to the highway is being repaired with a light application of gravel.

Harold Sonnevill was taken to the Red Deer Hospital with ruptured appendix. All wish for him a speedy recovery.

The Clive Tennis Boys went for an early morning duck shoot on Monday. A few mudhens suffered but the ducks were quite safe.

Mr. and Mrs. Wm. Tulock were presented with a baby boy in Red Deer hospital on Saturday, Oct. 10th.

Mr. Trotter is here again looking after business interests and incidentally doing a little duck shooting with E. R. Reynolds.

The Ladies' Aid met at the home of Mrs. Martin last Thursday.

The Misses Kocher, Pierce and Watson of the teaching staff of Clive School attended the Teachers' Convention at Lacombe last Thursday and Friday.

A Young People's rally was held at the Baptist Church on Tuesday afternoon and evening, Oct. 13th.

LOCAL STORE ENTERED

Caught in the act of breaking into a local store by local police on Sunday night last, several juveniles will be arraigned in juvenile court next Wednesday to be dealt with. It is understood these juvenile miscreants were bent on mischief which was carried too far.

Mrs. M. White, Pioneer, Passes Away

Old-timers of this district will be very sorry to hear of the death of an esteemed pioneer who lived here some years ago, Mrs. Matthew White, who died in Vancouver, B.C., Tuesday, Oct. 13th. Mrs. White came to this country before the turn of the 20th century and lived here until 1916. Her husband the Rev. Matthew White, was superintendent of the Presbyterian Mission in Alberta until his death.

After the death of her husband in 1931 at Calgary, Mrs. White moved to Merritt, B.C., where she lived with her daughter, Mrs. G. B. Armstrong, until last year, when she moved to Vancouver.

Mrs. White leaves to mourn her loss two daughters, Mrs. P. C. Owen of Lacombe and Mrs. G. B. Armstrong of Merritt, B.C., and two sons, L. J. Standish of Toronto and Leslie Standish of Windsor.

Choir Entertained By Local Hostesses

Mrs. E. Mann, Mrs. J. Lamont and Mrs. H. E. Wilson were hostesses when they entertained St. Andrew's Senior Choir, Mrs. Wilson's home on Thursday evening. Following an evening of hilarious fun at several unique games and contests, the president, C. E. Todd, welcomed the new members to the choir, particularly Mrs. R. Warren, who has taken over the duties of organist.

Also on behalf of the choir, Mr. Todd presented Mrs. John MacDonaid, who has to her credit the longest term in the choir and who has for the past year acted as leader, with a handsome necklace. Delicious refreshments were served by the hostesses, after which the guests enjoyed a hearty sing-song.

A.Y.P.A. HOLD MEETING

The local Anglican Young People's Association spent an entertaining evening last Tuesday when they held their regular weekly meeting at the home of Mrs. Henry Lewis, as the church basement is being repaired and walls reconstructed.

Rev. W. E. Herbert led a religious discussion and later business matters were discussed, the most important of these being a forthcoming dance, which it was decided to hold at Spruceville some time in the near future.

After the serving of refreshments a sing-song was enjoyed.

VEGETABLES BEING SHIPPED

A carload of vegetable for people in the dried-out areas of Alberta is to be loaded under the supervision of the Presbytery of Lacombe. Any one wishing to contribute will please notify the nearest United Church minister.
